FRONT-END DEVELOPER at INTEIA 10/07/2022 ~ 8/07/2024

I am happy with my time in INTEIA in which we have more than 5 applications to production.

- **D33P landing page and dashboard:** D33P automates capacity processes, detection, classification, and monitoring of road actors, by means (Deep Learning and Artificial Intelligence) and computer vision (image analytics). React.js 2019, MaterialUI.

- **Appimotion landing page and dashboard:** Appimotion is an agile and practical application for you to efficient and monitor mobility in your organization. React.js, MaterialUI.

- **DCT Foundation design:** Foundations Design is an application for analytics, calculation and compilation of design data and costs for energy towers foundations. React.js, MaterialUI, AgGridReact.

- **SmartCity:** It is INTEIA's most ambitious project, collects all previous applications already created for smart cities. React.ts, Tailwind.

SOLO DEVELOPER 28/09/2021 ~ 2022

I have worked on my own projects to strengthen my knowledge of development, frontend and backend, in my portfolio and others. With the aim of having projects to show in job interviews to be able to get my first job as developer, i've applied my design and automation knowledge, all my learning notes are in my **Github profile student**.

EDUCATION 28/09/2021 ~ today

At the moment Self-taught with 13+ certificates of completion, Platzi & Others platforms | React.js | Node.js | Python | Typescript | Typescript Advanced | Closures and scope Javascript | CSS3 | SCSS | Javascript | ES6+ | OOP | Node | Nest | Next | Webpack | SPa | Effective time management | Responsive design: mobile first | SOFTWARE ENGINEERING FUNDAMENTALS.
